The Loose Ring is our uncomplicated tried and trusted cheek. No matter what your rein tension the mouthpiece alignment to the mouth remains unchanged. The flattened underside of the Flex^Z™ cannons with their anatomy-inspired recesses are held parallel to the tongue whatever riding activity you enjoy.

This innovation is brilliant for the over-active busy mouth that chomps and chews on the mouthpiece. Turtle Top™ with Flex™ keeps the mouthpiece centred and arched over the tongue at all times, safely helping to prevent sideways tongue evasions. This comfortable mouthpiece re-focuses the inattentive mouth back onto the rein aids in order to achieve a soft consistent contact.

Anatomically engineered this bit helps the horse that has difficulty flexing itself and rounding over the bit in order to achieve a true and correct outline.
