This innovation is brilliant in helping to achieve a comfortable and quiet mouth. Turtle Top™ with Flex™ keeps the mouthpiece centred and arched over the tongue at all times, encouraging relaxation. This comfortable mouthpiece re-focuses the inattentive mouth back onto the rein aids in order to achieve a soft consistent contact.

This combination of Baucher cheek and Turtle Top™ mouthpiece usually helps the rider to achieve and maintain a rounder and more correct outline. If your horse is constantly resisting, strung out or coming above the bit the usual response to the Turtle Top™ Baucher is a head lowering action and softer feel through the rein. This design often proves beneficial for the over sensitive mouth. Highly recommended where help is needed for straightness and bend.
