A design for more control. Does your horse lean, snatch or pull? Does he fully understand the aids but continues to ignore you? Do you have an independent seat with hands that will reward once he responds? The NS Waterford is designed to give you the control back whilst eradicating the fighting and pulling that often causes damage ultimately leading to a hard mouth. As the Waterford is flexible and bends in every direction it usually suits all types of mouth conformation, including big, fat tongues. This slimmer, innovative Waterford mouthpiece features our ergonomic **LipSMART** shelf which usually eradicates the previous common problem of rubs.
