A Bit of Magic. Is your horse strung out, ‘wooden’ and sometimes ignores your requests for outline and self-carriage? The combination of the Baucher cheek and the Waterford mouthpiece encourages a rounder outline, a lighter way of going and reinforces directional control. As the Waterford bends in every direction it usually suits all types of mouth conformation, including big, fat tongues. This slimmer, innovative Waterford mouthpiece features our ergonomic **LipSMART** shelf which usually eradicates the previous common problem of rubs.
