Greatly clarifies and emphasises the signals through the rein. Promoting self carriage and throughness, a true outline and freedom through the shoulder can be developed.

The Verbindend has consistently helped eradicate tongue evasions, encouraging the horse to soften and relax through the jaw.

The cleverly curved mouthpiece can also enhance the development of the bend for lateral work and smaller circles. This dressage legal snaffle is not severe so if you are a pleasure rider and simply wish to lift the forehand then this bit is a logical choice.
